## Computer Systems Engineering Student | Systems & Software Automation | Applied AI

### SELECTED PROJECTS

- **Unravel — UNESCO Youth Hackathon 2026 | News Traceability Graph**  
Developed a media-literacy web application that traces the origin and evolution of news stories across multiple sources through an interactive visual graph. Contributed to UI/UX design, frontend development, project documentation, and production of the final submission video.
- **Chrono Check — University Hackathon | May 2026**  
Developed a digital employee attendance and workforce-management prototype featuring facial-recognition-based check-in/check-out and administrative monitoring. Contributed to frontend development, UI design, backend functionality, and preparation and delivery of the final presentation and pitch.
- **Embedded AI Magic Wand — Hangzhou Dianzi University (HDU) | China, Jun 2026**  
Developed an embedded gesture-recognition system using a microcontroller and neural network. Collected motion data, trained and tested the recognition model, and programmed and debugged the embedded application for real-time gesture recognition.
- **Autonomous Line-Following Smart Car — Hangzhou Dianzi University (HDU) | China, Jun 2026**  
Built and programmed an autonomous smart car using ESP32 and Micro Python, integrating grayscale sensors, PWM motor control, and line-following logic. Performed circuit soldering, hardware assembly, programming, testing, and iterative debugging.

### EDUCATION

- **Instituto Tecnológico de Saltillo**  
Bachelor of Computer Systems Engineering (2023 – Present)

### CERTIFICATIONS & TRAINING

- **Intelligent Car and Smart Devices Program | Hangzhou Dianzi University (HDU) — Hangzhou, China | June 2026**  
International program covering intelligent vehicles, embedded systems, microcontrollers, neural networks, and smart-device development through hands-on projects.
- **Google Cloud Computing Foundations Certificate (Networking & Compute) — Google Cloud**

### SKILLS

- **Programming & Backend:** Python, SQL, MySQL, REST APIs, Database Design
- **Systems & Tools:** Linux, Git, Docker, Google Cloud Platform (GCP)
- **Networking:** IP Addressing, Subnetting, Routing, DNS

### EXPERIENCE

- **Sales & Customer Outreach Representative / The Call Gurus, Saltillo Mexico Jun 2025 – Sept 2025**  
Conducted outbound calls in English to U.S.-based clients, working with performance metrics, structured workflows, and goal-driven environments. Developed strong communication skills and accountability in a professional setting.
- **Math & English Instructor / Kumon North America Inc., Saltillo México / Jun 2024 – Feb 2025**  
Provided academic support in English and Math, assisting with structured learning processes and student progress tracking.

### LANGUAGES

- **English:** Bilingual Proficiency | **Spanish:** Native
